DEBOJYOTI GHOSH

Center for Applied Scientific Computing,
Lawrence Livermore National Laboratory
7000 East Ave, Livermore, CA 94550
ghosh5@llnl.gov; http://debog.github.io/

SUMMARY

o Numerical method for hyperbolic partial differential equations – conservative finite-difference and finite-volume methods, high-order time integration methods (implicit, implicit-explicit, and multirate methods).
o Domain discretization techniques – overset meshes, mapped multi-block grids, immersed boundary methods.
o Applications: external compressible and incompressible flows, atmospheric flows, aerodynamic flows – rotorcraft and flapping wing aircraft, fusion plasma applications.
o High-performance computing – design and implementation of scalable algorithms on HPC platforms, specifically DOE Leadership-class supercomputers.

PROFESSIONAL EXPERIENCE

COMPUTATIONAL SCIENTIST – LAWRENCE LIVERMORE NATIONAL LABORATORY (Livermore, CA) (February 2018 – Present)

Center for Applied Scientific Computing

o High-order numerical methods for fusion plasma applications: Development of computational tools for the simulation of plasmas in fusion devices and related applications, including magnetically confined fusion (MFE) and inertial confinement fusion (ICF).
o IMEX methods for multiscale problems: Efficient implementation of IMEX methods for physics applications with multiple time scales; Example application: kinetic modeling of tokamak-edge plasma dynamics

POSTDOCTORAL RESEARCH STAFF MEMBER – LAWRENCE LIVERMORE NATIONAL LABORATORY (Livermore, CA) (October 2015 – February 2018)

Center for Applied Scientific Computing

o High-order time integration methods for continuum kinetic systems: Implemented implicit-explicit time integration methods in COGENT, a high-resolution finite-volume solver for kinetic models of fusion edge plasmas.
o Multirate semi-implicit time integrators for AMR-based atmospheric flow simulations: Co-developed and tested semi-implicit multirate methods for the efficient and scalable simulation of atmospheric flows.

POSTDOCTORAL APPOINTEE – ARGONNE NATIONAL LABORATORY (Lemont, IL) (February 2013 – October 2015)

Mathematics and Computer Science Division,

and FELLOW – COMPUTATIONAL INSTITUTE, THE UNIVERSITY OF CHICAGO (Chicago, IL) (March 2015 – October 2015)

o High-order semi-implicit time integration methods & applications: Co-developed and tested semi-implicit time-integrators for atmospheric flows; implemented IMEX RK and Rosenbrock methods in an operational numerical weather prediction code.
o Scalable non-linear compact finite-difference schemes: Developed a scalable and efficient implementation of non-linear compact schemes for massively parallel simulations; demonstrated their performance on DOE Leadership-class supercomputer.
o Conservative, high-resolution methods for limited-area atmospheric flows: Derived well-balanced conservative finite-difference discretization; derived characteristic-based splitting for efficient semi-implicit time-integration.

RESEARCH ASSISTANT – UNIVERSITY OF MARYLAND (College Park, MD) (Jul 2008 – Jan 2013)

Alfred Gessow Rotorcraft Center, Aerospace Engineering

o High-resolution non-oscillatory schemes for turbulent flows: Derived and implemented a new class of weighted non-linear compact schemes for hyperbolic PDEs; applied them to DNS of benchmark turbulent flow problems and flows around rotary and flapping wing aircraft.
o Numerical simulation of vortex-dominated flows: Developed a high-order accurate unsteady flow solver for incompressible flows on staggered meshes; simulated the impingement of multiple vortices on solid surface; implemented immersed boundaries to study effect of idealized fuselage shapes on rotorcraft wake flow.

EDUCATION

o **DOCTOR OF PHILOSOPHY** (January 2013)
   University of Maryland, Applied Mathematics & Statistics, and Scientific Computation
   Application Areas: Fluid Mechanics, Rotorcraft Aerodynamics
o Dual Degree (**BACHELOR OF TECHNOLOGY** and **MASTER OF TECHNOLOGY**) (July 2006)
   Indian Institute of Technology Bombay, Aerospace Engineering
   Application Areas: Aerodynamics, Computational Fluid Dynamics

   ### OTHER TRAINING PROGRAMS
   o Argonne Training Program in Extreme-Scale Computing (ATPESC) (St. Charles, IL, 2014)
   o Computational Machine Learning for Scientists and Engineers, ECE Continuum (University of Michigan), June 2021. (tinyurl.com/x34hzvb9)

REPRESENTATIVE PROPOSAL AWARDS

o Addressing key physics problems in high-energy-density plasmas with a novel kinetic simulation capability (Co-Investigator) - LLNL Laboratory Directed Research and Development Program, ~$650K/yr., 2023 – 2026.

o Interpenetrating Plasmas (Principal Investigator) – LLNL LDRD Program, ~$500K/yr, 2017 - 2020

PROFESSIONAL ACTIVITIES

o Technical committee member – AIAA Atmospheric and Space Environments (2016 – Present).

o Visiting researcher: Department of Applied Mathematics, Naval Postgraduate School (Host: Francis Giraldo), September 2015; Computer, Electrical and Mathematical Sciences & Engineering, King Abdullah University of Science and Technology (Host: David Ketcheson), June 2015.

o Conference session chair/co-chair: 7th AIAA Atmospheric and Space Environments Conference (Numerical Weather Prediction), SIAM Annual Meeting 2014 (Numerical Methods in PDE VII)

o Reviewer: Comput. Math. Appl., J. Sci. Comput., J. Comput. Phys., J. Adv. Mod. Earth Sys., Int. J. Comput. Fluids Dyn., Int. J. Num. Meth. Fluids, Int. J. High Perf. Comput. Appl., Int. J. Comp. Math, and others.

o Organizer of the LANS Informal Seminar Series at the MCS Division, Argonne National Laboratory (2013 – 2015)

SCIENTIFIC SOFTWARE CONTRIBUTIONS — PETSc (Contributor) – Portable, extensible toolkit for scientific computing; NUMA (Contributor) – A massively parallel numerical weather prediction code; COGENT (Contributor) – A high-order finite-volume solver for tokamak edge simulations; HyPar (Developer) – A conservative finite-difference solver for n-dimensional hyperbolic-parabolic PDEs.

TECHNICAL SKILLS — C/C++, FORTRAN, Julia, Python, MATLAB, MPI, OpenMP, HPCToolkit, Tecplot, LLNL VisIt, Git, SVN

CURRICULUM VITAE — http://debog.github.io/Files/cv_ghosh.pdf
