

Debojyoti Ghosh

Computational Scientist, Center for Applied Scientific Computing, Lawrence Livermore National Laboratory

ghosh5@llnl.gov | debojyoti.ghosh@gmail.com | debog.github.io | ORCID 0000-0003-3910-2613 | Google Scholar | github.com/debog

RESEARCH INTERESTS

- Simulation data and solvers for scientific machine learning and reduced-order modeling; exploratory work on learned denoisers for particle-in-cell data.
- Numerical methods for PDE-based models: high-order finite-difference and finite-volume schemes, implicit and semi-implicit time integration.
- Domain discretization: overset meshes, mapped multi-block grids, immersed boundary methods.
- Particle-based and agent-based methods.
- High-performance computing: design and implementation of scalable algorithms on DOE leadership-class platforms.
- *Applications*: fusion and high-energy-density plasmas, atmospheric and cloud physics, compressible and incompressible aerodynamics, epidemiology.

PROFESSIONAL EXPERIENCE

Computational Scientist

Feb 2018 – present

Center for Applied Scientific Computing, Lawrence Livermore National Laboratory

- Machine learning for simulation: conditioned neural denoisers for implicit particle-in-cell methods; reduced-order models for plasma dynamics and cloud microphysics.
- Particle-based methods: super-droplet cloud microphysics, including ice processes, in a performance-portable numerical weather prediction code; implicit particle-in-cell algorithms for dense plasmas.
- Agent-based models: agent interaction fidelity, disease spread, and capacity-limited hospital care in an exascale-capable epidemiological code.
- High-order discretization and implicit-explicit time integration for magnetically confined plasmas, atmospheric flows, and gas optics.
- Multifluid models for interpenetrating plasmas in inertial confinement fusion.

Postdoctoral Research Staff Member

Oct 2015 – Feb 2018

Center for Applied Scientific Computing, Lawrence Livermore National Laboratory

- Implicit-explicit time integration for continuum kinetic simulation of collisional magnetized plasmas.
- High-order finite-volume algorithms for tokamak edge plasma simulation.
- Multirate semi-implicit integrators for adaptive-mesh atmospheric flow solvers.

Postdoctoral Appointee

Feb 2013 – Oct 2015

Mathematics and Computer Science Division, Argonne National Laboratory

Fellow

Mar 2015 – Oct 2015

Computation Institute, The University of Chicago

- Implemented multi-stage implicit, explicit, and implicit-explicit Runge-Kutta schemes, and general linear methods with global error estimation, in PETSc.
- Applied high-order time integrators to production physics codes, including numerical weather prediction.
- Scalable implementation of nonlinear compact finite-difference schemes on DOE leadership-class platforms.
- Well-balanced, conservative finite-difference methods for limited-area atmospheric flows.
- Probability density function methods for power systems with uncertain input.

Graduate Research Assistant

Aug 2008 – Jan 2013

Alfred Gessow Rotorcraft Center, Aerospace Engineering, University of Maryland

- Derived, analysed, and implemented the CRWENO family of high-resolution non-oscillatory compact reconstruction schemes.
- Developed a three-dimensional Cartesian incompressible Navier-Stokes solver with immersed boundaries for high-Reynolds-

number flows.

- Applied these methods to direct numerical simulation of compressible turbulence, vortex-ring and wall interaction, and rotorcraft wake modeling.

Research Assistant

2003 – Jun 2006

Department of Aerospace Engineering, Indian Institute of Technology Bombay

- High-order non-oscillatory schemes for ideal magnetohydrodynamics, including an analysis of non-convexity effects on convergence.
- Finite-volume time-domain solution of Maxwell's equations to predict the radar cross-section of low-observable aircraft.

Summer Intern

May – Aug 2004

Infotech Enterprises, Pratt & Whitney Canada Center of Excellence, Bangalore

- Computational analysis of an effusion-cooled plate representing a gas turbine combustion chamber casing.

EDUCATION

Doctor of Philosophy, Applied Mathematics and Statistics, and Scientific Computation

Jan 2013

University of Maryland, College Park • Adviser: James D. Baeder

Master of Technology and Bachelor of Technology (dual degree), Aerospace Engineering

Jul 2006

Indian Institute of Technology Bombay • Adviser: Avijit Chatterjee

TRAINING PROGRAMS

- Generative AI, industrial short course, Institute for Pure and Applied Mathematics, UC Los Angeles, March 2026.
- End-to-End AI for Science Bootcamp, NERSC, December 2025.
- Reinforcement Learning course, 2024.
- Computational Machine Learning for Scientists and Engineers, ECE Continuum, University of Michigan, June 2021.
- Argonne Training Program on Extreme-Scale Computing (ATPESC), August 2014.

TECHNICAL SKILLS

Machine learning	PyTorch, distributed data-parallel training, U-Net and encoder–decoder architectures, diffusion models, attention, autoencoders, physics-informed objectives, reduced-order modeling
Languages	C++, C, Python, CUDA, MATLAB
Parallel	MPI, OpenMP, CUDA, AMReX, multi-GPU training
Libraries	PETSc, SUNDIALS, Chombo, hypre, FFTW, NumPy, yt
Tooling	Git, CMake, GNU Autotools, Spack, pytest, Jupyter, $\text{\LaTeX}$
AI-assisted dev	Claude Code, OpenAI Codex, Cursor
Visualization	VisIt, Matplotlib, Tecplot

SCIENTIFIC SOFTWARE

- **HyPar** (developer) — conservative finite-difference solver for n -dimensional hyperbolic-parabolic PDEs.
- **EUCLID** (developer) — high-order conservative finite-difference code for multifluid plasma simulation.
- **TridiagLU** (developer) — parallel solvers for distributed tridiagonal systems.
- **particle-denoise** (developer) — PyTorch denoiser for particle-in-cell simulation moments. Early-stage, unpublished.
- **ERF** (lead developer of the Super-Droplet Method; 53 merged pull requests) — performance-portable numerical weather prediction code. Particle-based cloud microphysics including ice processes, AMR support, terrain-following particle advection, and GPU portability.
- **ExaEpi** (key developer; 31 merged pull requests) — exascale-capable agent-based epidemiological model. Multi-disease tracking with co-immunity and co-susceptibility, capacity-limited hospitalization, and the agent-interaction kernels.
- **WarpX** (solver and preconditioner developer; 7 merged pull requests) — exascale particle-in-cell code. Curl-curl preconditioner, sparse-matrix Jacobian assembly, and the PETSc SNES/KSP interface for implicit electromagnetic PIC.
- **PETSc** (contributor) — Runge-Kutta, additive Runge-Kutta, and general linear methods with global error estimation.

- **COGENT** (contributor) — high-order continuum gyrokinetic code for tokamak edge simulation.
- **PICNIC** (contributor) — particle-in-cell code with Coulomb collisions.
- **PIAFS** (co-developer) — high-order nonlinear hydrodynamics with photochemistry for gaseous optics, including the CUDA implementation. <https://github.com/LLNL/piafs>
- **NUMA** (contributor) — massively parallel numerical weather prediction code.

M., *Characteristic-Based Slow-Wave-Fast-Wave Partitioning for Semi-Implicit Time Integration of Atmospheric Flows*, IMAGE 2017 Theme of the Year: Workshop on Multiscale Geoscience Numerics, National Center for Atmospheric Research (NCAR), May 16 - 19, 2017, Boulder, CO.
- Ghosh, D.**, Dorr, M., Dorf, M., Hittinger, J., *Implementation of Implicit-Explicit Time Integration for the Kinetic Modeling of Tokamak Plasma Edge*, SIAM Conference on Computational Science and Engineering, Minisymposium on Computational Plasma Physics, February 27 - March 3, 2017, Atlanta, GA.
- Dorr, M., Colella, P., Dorf, M., **Ghosh, D.**, Hittinger, J., *Exact Preservation of Zero Velocity Divergence in a High-Order, Mapped-Grid, Finite-Volume Discretization of a Gyrokinetic System*, SIAM Conference on Computational Science and Engineering, Minisymposium on Computational Plasma Physics, February 27 - March 3, 2017, Atlanta, GA.
- Ghosh, D.**, Constantinescu, E. M., *Characteristic-Based Flux Splitting for Implicit-Explicit Time Integration of Low-Mach Number Flows*, 13th U.S. National Congress on Computational Mechanics (USNCCM13), Minisymposium on Advances in Implicit / Explicit (IMEX) Time integration of Multiphysics Systems, July 26 - 30, 2015, San Diego, CA.
- Ghosh, D.**, Constantinescu, E. M., *A Finite-Difference Algorithm with Characteristic-Based Semi-Implicit Time-Integration for the Euler Equations with Gravitational Forcing*, SIAM Conference on Mathematical & Computational Issues in the Geosciences, Minisymposium on Modeling and Simulation of Multiscale and Coupled Processes in Atmospheric Physics, June 29 - July 2, 2015, Stanford, CA.
- Ghosh, D.**, Constantinescu, E. M., *A Compact-Reconstruction WENO Scheme with Semi-Implicit Time Integration*, SIAM Conference on

Computational Science and Engineering, Minisymposium on Recent Advances in High Order Spatial Discretization Methods for PDEs, March 14 - 18, 2015, Salt Lake City, UT.

Ketcheson, D., **Ghosh, D.**, *Stability-Optimized Time Integrators for WENO Discretizations*, SIAM Conference on Computational Science and Engineering, Minisymposium on Advances in Time-stepping Methods, March 14 - 18, 2015, Salt Lake City, UT.

Barajas-Solano, D. A., Tarakovsky, A., **Ghosh, D.**, Constantinescu, E. M., Abhyankar, S., *Probability Density Methods for the Analysis of Power Grids Under Uncertainty*, SIAM Conference on Computational Science and Engineering, Minisymposium on Distributed Cyber-Physical Systems: Modelling and Controlling the Power Grid, March 14 - 18, 2015, Salt Lake City, UT.

Ghosh, D., Constantinescu, E. M., Brown, J., *Scalable Non-Linear Compact Schemes*, International Conference on Spectral and High Order Methods (ICOSAHOM), Minisymposium on Aspects of Time Stepping, June 23 - 27, 2014, Salt Lake City, UT.

Compact-Reconstruction WENO Schemes - Theory, Implementation and Applications, National Institute of Aerospace, June 2014, Hampton, VA.

OTHER CONFERENCES, MEETINGS, TALKS AND POSTERS (55)

Angus, J. R., Grote, D., **Ghosh, D.**, van de Wetering, J. J., Kemp, A., Vay, J.-L., *Energy-Conserving Implicit Particle-in-Cell Method in WarpX for Dense, Fusion Plasmas*, 2026 IEEE International Conference on Plasma Science (ICOPS), 93.

Lehe, R., Angus, J. R., **Ghosh, D.**, Groenewald, R., Huebl, A., Formenti, A., Grote, D., Myers, A., Shalpoval, O., Vay, J.-L., Zhang, W., Zoni, E., *WarpX for Fusion Research: Recent Advances and New Capabilities*, 67th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), November 17 - 21, 2025, Long Beach, CA.

Oudin, A., **Ghosh, D.**, Kur, E., Lancia, L., Riconda, C., Ou, K., Perez-Ramirez, V. M., Cao, S., Singh, D., Redshaw, C., Rajesh, H., Dedeler, P., Edwards, M. R., Michel, P., *Nonlinear Modeling of Photochemically-Induced Gaseous Optical elements*, 13ème Forum Lasers et Plasmas, June 2 - 6, 2025, Le Plan-de-la-Tour, France. Also presented at: 53rd Annual Anomalous Absorption Conference, May 11 - 16, 2025, Sedona, AZ.

Dorf, M., Dorr, M., **Ghosh, D.**, Umansky, M., Geyko, V., Angus, J., Soukhanovskii, V., *Implicit simulations of collisional transport in magnetized plasmas with the continuum gyrokinetic code COGENT*, Sherwood Fusion Theory Conference, April 7 - 9, 2025, New York, NY.

Angus, J. R., van de Wetering, J. J., Farmer, W., Friedman, A., Fu, Y., Geyko, V., **Ghosh, D.**, Grote, D., Larson, D., Zimmerman, G., *An implicit particle code for fully kinetic simulations of burning plasmas*, IFE-STAR Conference, April 7, 2025, Breckenridge, CO.

Terasaki, G. M., **Ghosh, D.**, Navid, A., *Examining Complex Disease Spread Dynamics in Schools and Workplaces Using An Exascale Agent-Based Framework*, SIAM Conference on Computational Science and Engineering, March 3 - 7, 2025, Fort Worth, TX.

Salian, L. V., Rathan, S., **Ghosh, D.**, *A new central compact finite difference scheme with high spectral resolution for dispersive equations*, 19th International Conference on Hyperbolic Problems: Theory, Numerics and Applications, July 1 - 5, 2024, Shanghai, China.

Ricketson, L., Dorr, M., Dorf, M., **Ghosh, D.**, *Solvers and preconditioners enabling flexible IMEX integration of fusion plasmas in COGENT*, 18th Copper Mountain Conference on Iterative Methods, April 14 - 19, 2024, Copper Mountain, CO.

Angus, J., Farmer, W., Friedman, A., Geyko, V., **Ghosh, D.**, Grote, D., Larson, D., Link, A., *An implicit particle code with exact energy and charge conservation for dynamically compressing plasmas: Solver scaling and performance*, 18th Copper Mountain Conference on Iterative Methods, April 14 - 19, 2024, Copper Mountain, CO.

Dorf, M., Dorr, M., **Ghosh, D.**, Angus, J. R., *Modeling tokamak edge plasma with the continuum full-F code COGENT*, 65th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 30 - November 3, 2023, Denver, CO.

Dun, J., Angus, J. R., Farmer, W., Friedman, A., Geyko, V. I., **Ghosh, D.**, Graziani, F. R., Grote, D., Larson, D., Link, A. J., Zimmerman, G. B., *Particle-in-cell simulations of shockwaves in plasma*, 65th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 30 - November 3, 2023, Denver, CO.

Angus, J. R., Farmer, W., Friedman, A., Ghosh, D., Grote, D., Larson, D., Link, A. J., *An implicit particle code with exact energy and charge conservation for electromagnetic studies of dense plasmas*, 65th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 30 - November 3, 2023, Denver, CO.

Tsai, P.-H., Chung S. W., **Ghosh, D.**, Choi, Y., Belof, J., *Accelerating Kinetic Simulations of Electrostatic Plasmas with Reduced-Order Modeling*, 65th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 30 - November 3, 2023, Denver, CO.

Ghosh, D., Dorr, M., Dorf, M., Ricketson, L., *High-order implicit-explicit time integration for the kinetic simulation of magnetized plasmas*, Foundations of Computational Mathematics (FoCM), Workshop on Multiresolution and Adaptivity in Numerical PDEs, June 12 - 21, 2023, Paris, France.

Angus, J., Farmer, W., Friedman, A., **Ghosh, D.**, Grote, D., Larson, D., Link, A., *An implicit particle code with exact energy and charge conservation for electromagnetic studies of dense plasmas*, International Conference on Plasma Science (ICOPS), May 21 - 25, 2023, Santa Fe, NM.

Dorf, M., Dorr, M., **Ghosh, D.**, Angus, J., *Including electromagnetic effects into COGENT simulations of edge plasmas*, U.S. Transport Task

- Force (TTF) Workshop, May 2 - 5, 2023, Madison, WI.
- Geyko, V., Joseph, I., Dorf, M., Dorr, M., **Ghosh, D.**, *Electrostatic drift-kinetic simulations of edge localized mode heat pulses in the tokamak scrape-off layer*, 64th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 17 - 21, 2022, Spokane, WA.
- Dorf, M., Dorr, M., **Ghosh, D.**, Angus, J., *Progress with the full-F continuum edge gyrokinetic code COGENT*, 64th Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), October 17 - 21, 2022, Spokane, WA.
- Geyko, V., Joseph, I., Dorf, M., Dorr, M., **Ghosh, D.**, *Drift kinetic simulations of edge localized modes in tokamak scrape-off layer plasmas*, 25th International Conference on Plasma Surface Interaction in Controlled Fusion Devices, June 13 - 17, 2022, Virtual Format.
- Angus, J. R., Link, A., Friedman, A., **Ghosh, D.**, Johnson, J. D., *On numerical energy conservation for an implicit particle-in-cell method coupled with a binary Monte-Carlo algorithm for Coulomb collisions*, 49th IEEE International Conference on Plasma Science (ICOPS), May 22 - 26, 2022, Seattle, WA.
- Dorf, M., Dorr, M., **Ghosh, D.**, Cohen, R., *Gyrokinetic Modeling of Electrostatic Ion-Scale Turbulence in Divertor Tokamaks*, 63rd Annual Meeting of the American Physical Society's Division of Plasma Physics (DPP), November 8 - 12, 2021, Pittsburgh, PA.
- Joseph, I., Geyko, V. I., Dorf, M. A., Dorr, M. R., **Ghosh, D.**, Ricketson, L. F., *Edge localized mode propagation through the tokamak scrape-off layer*, Plasma Edge Theory (PET) Workshop, September 13 - 15, 2021, Virtual Format.
- Ghosh, D.**, Berger, R. L., Chapman, T., Dimits, A., Banks, J. W., *Hydrodynamic Simulation of Counterstreaming Plasmas with a Multifluid Model*, 72nd Annual Meeting of the American Physical Society's Division of Fluid Dynamics (DFD), November 23 - 26, 2019, Seattle, WA.
- Chapman, T., Berger, R. L., Dimits, A., **Ghosh, D.**, Joseph, I., Winjum, B., Banks, J. W., Brunner, S., *Nonlinear evolution of the ion-ion streaming instability in single- and multi-ion species plasmas*, 61st Annual Meeting of the APS Division of Plasma Physics (DPP), October 21 - 25, 2019, Fort Lauderdale, FL.
- Berger, R., **Ghosh, D.**, Banks, J. W., Arrighi, W. J., Belyaev, M. A., Brunner, S., Chapman, T., Copeland, D. M., Dimits, A., Hittinger, J., Jones, O., Rozmus, W., *Multi-dimensional Simulations of Interpenetrating Plasmas*, 49th Anomalous Absorption Conference, June 9 - 14, 2019, Telluride, CO.
- Berger, R., **Ghosh, D.**, Chapman, T., Arrighi, W., Banks, J., Dimits, A. M., Hittinger, J., Joseph, I., Kavouklis, C., *High-order Conservative, Eulerian, Multi-dimensional Hydrodynamic Simulations of Interpenetrating Plasmas*, 60th Annual Meeting of the APS Division of Plasma Physics, November 5 - 9, 2018, Portland, OR.
- Angus, J. R., Dorf, M., Ghosh D., *Drift-Ideal MHD Simulations of Flow-Stabilized Z-Pinch Plasmas*, 60th Annual Meeting of the APS Division of Plasma Physics, November 5 - 9, 2018, Portland, OR.
- Ghosh, D.**, Kavouklis, C., Chapman, T., Berger, R., *A Finite-Volume, Semi-Implicit Multifluid Algorithm for the Simulation of Counterstreaming Plasma Dynamics*, SIAM Annual Meeting, July 9 - 13, 2018, Portland, OR.
- Dorf, M. A., Angus, J. R., **Ghosh, D.**, *Gyrokinetic Simulations of Drift-Wave Instabilities in Flow-Stabilized Z-Pinch Plasmas*, 45th IEEE International Conference on Plasma Science, June 24 - 28, 2018, Denver, CO.
- Angus, J. R., Dorf, M. A., **Ghosh, D.**, *Drift-Ideal MHD Simulations of the Entropy Mode in Flow-Stabilized Z-Pinch Plasmas*, 45th IEEE International Conference on Plasma Science, June 24 - 28, 2018, Denver, CO.
- Dimits, A. M., Banks, J. W., Berger, R. L., Brunner, S., Chapman, T., **Ghosh, D.**, Arrighi, W. J., Hittinger, J., Joseph, I., Kavouklis, C., *Linearized Coulomb Collision Operator for Simulation of Interpenetrating Plasma Streams*, Kinetic Effects in ICF Workshop, May 23, 2018, Santa Fe, NM.
- Dorf, M., Dorr, M., **Ghosh, D.**, Hittinger, J., Lee, W., Cohen R., *Drift-kinetic simulations of axisymmetric plasma transport at the edge of a divertor tokamak*, 59th Annual Meeting of the APS Division of Plasma Physics, October 23 - 27, 2017, Milwaukee, WI.

RESEARCH FUNDING

- Addressing key physics problems in high-energy-density plasmas with a novel kinetic simulation capability (**Co-Investigator**) — LLNL Laboratory Directed Research and Development (LDRD), ~\$650k/yr, 2023–2026.
- High-resolution methods for phase space problems in complex geometries (**Co-Investigator**) — DOE Office of Science, ASCR, ~\$900k/yr, 2017–2020 and 2021–2024.
- Simulation of high-energy-density plasmas using a novel, fully implicit particle-in-cell / Monte-Carlo algorithm (**Co-Investigator**) — LLNL LDRD, ~\$150k/yr, 2021–2022.
- Nonlinear spatial discretization on sparse grids (**Co-Investigator**) — LLNL LDRD, ~\$150k/yr, 2019–2020.
- Interpenetrating plasma simulations (**Principal Investigator**) — LLNL LDRD, ~\$650k/yr, 2017–2020.

PROFESSIONAL SERVICE

- Member, AIAA Atmospheric and Space Environments Technical Committee, 2016 – present.
- **Reviewer** — SIAM Journal on Scientific Computing; Journal of Computational Physics; Journal of Scientific Computing; ACM Transactions on Mathematical Software; Computer Physics Communications; Communications in Computational Physics; Physics of Fluids; Journal of Parallel and Distributed Computing; Journal of Advances in Modeling Earth Systems; International Journal for Numerical Methods in Fluids; Computers and Mathematics with Applications; International

Journal of Computational Fluid Dynamics; International Journal of High Performance Computing Applications; International Journal of Computer Mathematics; SC17.

- **Session chair / co-chair** — 7th AIAA Atmospheric and Space Environments Conference (Numerical Weather Prediction, with Nash'at Ahmad); SIAM Annual Meeting 2014 (Numerical Methods in PDE VII).
- **Visiting researcher** — Department of Applied Mathematics, Naval Postgraduate School (host: Frank Giraldo), September 2015; Computer, Electrical and Mathematical Sciences and Engineering, King Abdullah University of Science and Technology (host: David Ketcheson), June 2015.
- **Organizer** — LANS Informal Seminar Series, Mathematics and Computer Science Division, Argonne National Laboratory, 2013–2015.

HONORS AND AWARDS

- Travel award, International Conference on Spectral and High Order Methods, 2014.
- Graduate Research Assistantship, Alfred Gessow Rotorcraft Center, University of Maryland, 2008–2013.
- Block Grant Fellowship, Department of Mathematics, University of Maryland, 2006–2008.
- Research Assistantship, Department of Aerospace Engineering, Indian Institute of Technology Bombay, 2005–2006.

TEACHING

Teaching Assistant

Jul 2005 – May 2006

Department of Aerospace Engineering, Indian Institute of Technology Bombay

- Numerical Methods for Conservation Laws (graduate) — lectured on finite-volume methods for ideal magnetohydrodynamics; graded coding assignments.
- Compressible Gasdynamics (undergraduate) — graded assignments and examinations.
